

Make Your Auto-Hauler Self-Weighing

The industry's most accurate on-board scale system now has a complete weighing solution designed specifically for auto-haulers. Air-Weigh scales provide precise on-the-ground weights for the steer, drive, and trailer suspensions. Air-Weigh also provides the driver with accurate GVW and net payload weights. The auto-hauler on-board weighing solution includes both a standard trailer scale kit and a tractor scale kit with a steer-axle deflection sensor. The combination of the two kits allows for the most accurate weights possible for auto-haulers, including GVW.

Save Time While Loading Efficiently

With heavy auto loads, getting the weight correct over the suspension groups can be a challenge for even the most experienced driver. With the Air-Weigh auto-hauler solution, every driver can be confident of their loaded weights before leaving the loading site. For "weigh-as-you-load" applications, the Air-Weigh scale features an alarm that can be used to alert the driver when at or approaching a target weight.

Easy to Use

Weights are conveniently displayed on an in-dash digital display for steer, drive, trailer, GVW, and net payload. Because Air-Weigh scales display in pounds, and display weights for each suspension group, there is no need for guesswork or conversion tables.

Accuracy You Can Count On

With Air-Weigh scales, drivers are so confident of their loaded weights that they never check-weigh at an in-ground scale, even with the heaviest loads. Once calibrated, the weights displayed on the scale will read within 300 lbs accuracy of a DOT-certified platform scale. Air-Weigh is able to provide unmatched accuracy for auto-haulers because of the addition of the deflection sensor, which provides a precisely measured steer axle weight.

Return On Investment

Fleets worldwide depend on Air-Weigh on-board scales to help load more efficiently, reduce operating costs, and save time. Within weeks, your scales will pay for themselves:

- No more check-weigh trips or scale fees
- Load to the maximum weight without being overweight
- Load it right the first time, every time

Benefits are realized with each and every Air-Weigh equipped truck and trailer. Units for evaluation are available to qualified fleets. For more information, contact Air-Weigh Sales at (888) 459-3444.

Air-Weigh Scales for auto-haulers are available as factory options from leading OEMs, including Cottrell and Boydston.

Every auto-hauler brings its own scale to the loading site.

See all weights, including GVW, from the convenience of the cab.

Load Smart™

Manufactured in USA under one or more of the following US and foreign patents: 5,780,782; 5,478,974; 6,233,635; 1,305,191; 4,832,141; 260,494; 677,998. Additional US and foreign patents pending.
